

## ISCOM2128G | L2 Full Gigabit Ethernet Switch

### Product Overview

Raisecom ISCOM2128G as a L2 access switch is used to carry and aggregate various services in access layer. On one hand, ISCOM2128G with 4xGE combo ports at line side and 24x10/100/1000M Base-T interfaces at client side greatly strengthens the ability of access and aggregation so that it can meet customer demand for high bandwidth. On the other hand, the RPS power system guarantees network stability as well as extends the service life of the switch.

As a typical device of L2 access switch, ISCOM2128G can offer effective solutions for Triple-play FTTX and EPL/EVPL situations thanks to its compliance in standardized standards, including IEEE802.3ah, 802.1ag, ITU-T Y.1731 and ITU-T G.8032 (ERPS). Besides, it can coordinate with ISCOM2924 series to form a ring network in order to aggregate services efficiently. In addition, it also supports flexible and robust interoperations with ISCOM21XXEA-MA series to achieve flexible network infrastructure because of the consistent L2 function module.
